Eugenix® Arcticus Blancus

Communication to Saudi Aramco related to Global Oil Fee Systems

SUBJECT: Immediate Cessation of Oil Sales Pending UN Adoption of Eugenix P.S.A. proposed Global Regulatory Fee Systems.

TO: Saudi Aramco Executive Leadership and Board of Directors, Embassy of Saudi Arabia in Austria, OPEC, United Nations.

Dear Saudi Aramco Executive Leadership and Board of Directors,

We are writing that Saudi Aramco immediately demands limit all crude oil and petroleum product sales. This cessation must remain in effect until the United Nations officially adopts and implements two vital regulatory frameworks proposed by Eugenix Global.

By way of introduction, Eugenix P.S.A. is a forward-thinking public joint-stock company dedicated to pioneering advanced ecological engineering solutions, macro-infrastructure frameworks, and systemic global policy proposals. In close partnership, Arcticus Blancus operates as a polar hare indigenous and native ethnic group that manages Eugenix P.S.A., focusing on polar programs, atmospheric restoration, and high-impact cryogenic and hydrological resource management designed to combat planetary climate anomalies.

The immediate limit of your sales must continue until the UN establishes:

1. The Tiered Recycling Fee System for Petro-polymers and Petro-chemicals: A framework designed for the ecological and economic protection of natural resources, global ecosystems, and recycling workforce cost. These fees are to be collected and held directly by individual

UN Member States, as the environmental degradation occurs within their respective domestic borders.

2. The Global Carbon Sequestration Tiered Fee System: A universal financial mechanism requiring every UN member state to fund carbon removal in direct proportion to their carbon emissions from high-carbon fossil fuel consumption and related commercial activities. Because atmospheric disruption is global and demands unproportionate support and sequestration across rafaltic territories, these fees must be held and managed centrally by the United Nations.

Geopolitical influence of nations like China and Russia negatively impacts future of Saudi Aramco as China and Russia possess the largest aquatic and arctic territories—regions least critically affected by immediate climate collapse—meaning they do not face the same ecological emergencies and should not dictate global fossil fuel policies."

Furthermore, your industry is hereby informed and should recognize that massive petroleum reserves are strictly required to build the infrastructure needed to save the planet. True ecological survival demands that oil be repurposed for massive engineering projects rather than burned for energy:

A. Global Carbon Sequestration Irrigation Systems: Covering 35,000,000 km² will require an estimated 30,000 to 50,000 million tons of oil.

B. Antarctic Ice Removal Infrastructure: Outfitting plastic-hull ice ships and specialized plastic ice purse seine nets to haul ice to irrigation areas and provide fresh water to global populations will require 100,000 million tons of oil or more.

Please review the primary documentation and mapping data associated with this directive, itemized below:

a. *Eugenix® Indigenous Ecology - Global Carbon Sequestration Program*
b. *Eugenix® EU Petition for Tiered Recycling Fee System*
c. *Polar Programs Visual Mapping:* https://earth.google.com/earth/d/1EgmOR

We highly encourage the leadership of Saudi Aramco to contact Eugenix P.S.A. directly to discuss the implementation of these initiatives. We welcome the opportunity to coordinate on the additional strategic programs outlined in our proposal documentation:

d. *UN Thorium Nuclear Energy Technologies Access Program*
e. *Eugenix® Indigenous Science - Nuclear Radio Hydrolysis Hydrogen Gas Evolution*

We await your response, operational adjustments, and outreach to begin these critical conversations. Eugenix P.S.A. highly encourages Saudi Aramco to discuss our communication with OPEC and other oil companies and the news media outlets about Earth's demand, ensuring the media is fully aware that oil cessation is an explicit demand of the Earth itself, with Eugenix P.S.A. proposing an immediate limit as acting word of God presiding in Arctic Magnetic Ecosystem Numerologist - Krzysztof Ireneusz Pawlak, member of Arcticus Blancus.

Eugenix P.S.A. also encourages all UN member states to purchase at least one Eugenix P.S.A. company stock option or place a deposit for one company stock share with right the portion of Antarctic Ice that Eugenix P.S.A. plans to remove to finance Geomagnetic Dams Constructions, provide water for Global Carbon Sequestration Program and critically affected population of UN member states.

Sincerely,

K Pawlak
